FAYAT GROUP

13265 25th Ave NW,
ALL RENTAL INC.
PO Box 129
Rice, MN 56367

The new Bomag Tamperers are reliable due to the Honda four stroke engines. They have high compaction performance in a lighter weight frame than the competitors. With the low hand – arm-vibrations and ergonomic design it provides the operator much less strenuous work to complete the same compaction. This in turn provides more productivity. Simple operation with easy access shut down switch fuel and engine combined, Hour / Tach with integrated service indicator, low engine oil alert, and infinitely variable frequency. This design makes it easy for all users. Self cleaning air filter housing, dual fuel filter system, polyethylene shoe with steel wear plate, dual air filter systems (BT60-BT65), and single air filter system for BVT65 make these models less maintenance saving down time on site. All this adds to more productivity. The choice is clear with Bomag ruggedness and reliability.

MODEL	FUEL	STROKE	ENGINE	SHOE	WEIGHT	PRICE
