BPR Reversible Plate Tampers

BOMAG Reversible Plate Tampers have the features you want and the reliability you need when choosing a tamper for your needs. They all have high strength steel fully enclosed engine protection, hydraulic travel lever adjustment, lockable steering rod, highly wear resistant base plates and fully protected V-belts just to name a few features. Most have stock or optional BOMAG Economizer, electric start, transport wheels, Vulcolan mat, hour meter, and extension plates. With the versatility of these tampers and the ruggedness of their design you can see why BOMAG provides a superior product. Dollar for dollar you receive more compaction with BOMAG every time.

MODEL	FUEL	PLATE WIDTH	ENGINE	CENT.FORCE	WEIGHT	PRICE

Remote Controlled Reversible Vibratory Plate

BPH 80/65 S

The BPH 80/65 S is excellent for a confined area and trench compaction. With its standard features such as remote control, hydrostatic drive, low oil engine shut down, electric start, foldable style lifting point and lockable engine cover and dashboard it is easy to keep the operator out of harms way while getting the best compaction available in limited space situations.

With the easy service concept, and diagnostic module with failure codes servicing the machine is easier and quicker. The BPH 80/65 also has a wear resistant base plate with reinforced edges, the proven Hatz 1 D 90 W engine, and a fully covered component protection hood made of high strength steel. All of this will make servicing this machine easier and less of a hassle. That saves you time and money.

Options: The BPH 80/65 S comes standard with a cable remote. If your project requires the optional Cable / Radio Remote BOMAG has you covered. When you are on the job you can't be held back by dead batteries so BOMAG has the optional Mobile quick charger for the remote control as well.
